Full stack web developer with a passion for creating solutions. With experience in HTML/CSS, JavaScript, React & the MERN stack coupled with a background in military technologies, I discovered web development through my passion for tech. I bring strong skills in creativity & troubleshooting as well as attention to detail through my time as a paralegal and hope to create business solutions for companies.

## TECHNICAL SKILLS

---

HTML, CSS, JavaScript, MERN Stack (MongoDB, Express.js, React, Node.js) jQuery, Bootstrap, Firebase, MySQL, Security and Session Storage, User Authentication, Responsive Design, Cookies, Local Storage

## PROJECTS

---

### Rodde-It Blog Site

- Implemented the **MVC** paradigm to build a CMS-style blog using **MySQL** and **Sequelize**
- Built a **RESTful** application through **Express.js** that enables users to create an account which allows them to write a post, add comments as well as upvote or downvote on posts
- Dynamically rendered **JSON** data onto Handlebars.js to execute front-end functionality
- Utilized the **bcrypt** npm package to integrate authentication and security during user sign-up and log-in

### RecipeZ

- Utilized the Spoonacular and The CocktailDB **API** to create an application that allows users to search for a detailed recipe based on the search parameters for a food dish or drink
- Integrated the **Bulma** framework with a custom-made **CSS** stylesheet to deliver a polished **UI**
- Incorporated **JavaScript** to dynamically generate **HTML** recipe cards after search results have loaded
- Applied the **jQuery** library to conveniently enhance user experience features

### Employee Tracker

- A command-line application to manage a company's employee database, using **Node.js**, **Inquirer**, and **MySQL**.
- Utilized **Inquirer** to interact with the user via the command line, and the **Console Table Package** to print **MySQL** rows to the console

## EMPLOYMENT HISTORY

---
